SKILLS

- Experience with front & backend development
- Extensive knowledge in API & database design

TECH STACK

Python, JavaScript

Odoo ERP

Django

React

PostgreSQL

EXPERIENCE

Backend Team Lead — SIG Service

10/2024 – Present

Lead the backend team building the distribution and field-sales platform used by leading food, beverage and consumer goods multinationals and their nationwide distributor networks.

- Own backend architecture across the product suite: multi-company, multi-tenant deployments where pricing, territory and promotion logic is configuration rather than custom code
- Design the offline-first sync layer behind the mobile sales and delivery apps — queued operations, conflict resolution and idempotent APIs so a full day in the field survives a bad network
- Build Route-to-Market capabilities: territory and visit planning, routing, dispatch optimization and field force productivity
- Model the commercial core — pricing, discounts, trade promotions, credit and stock movements — across van sales, pre-sales and direct distribution flows
- Integrate with client ERP and accounting systems so master data, invoices and stock stay consistent on both sides
- Deliver KPI scoring, reporting and operational dashboards used daily by field agents, supervisors and management
- Lead the team on architecture decisions, code reviews and release planning, and work directly with enterprise client IT teams through onboarding and rollout

Python Odoo Backend Developer — SIG Service

07/2023 – 04/2024

- Developed Odoo ERP and CRM modules covering sales, inventory and customer management for enterprise clients
- Built REST APIs and PostgreSQL data models consumed by web and mobile front-ends
- Implemented reporting, views and workflow automation, and tuned queries against large transactional datasets

Internship — Yassir

12/2022 – 01/2023

Learned Yassir’s management methods and Scrum workflow, and built [a test API endpoint using NodeJS and ExpressJS](#).
JavaScript · NodeJS, ExpressJS · Agile SCRUM

Internship — Ayrade

06/2022 – 08/2022

[Built Odoo ERP modules using Python](#).
Python · Odoo ERP

EDUCATION

Master’s degree in Software Engineering

2021 – 2023

University Abdelhamid MEHRI, Constantine 2

Licence’s degree in Software Engineering

2018 – 2021

University Abdelhamid MEHRI, Constantine 2
